## INTENDED USE

This product is designed for carrying up to two children in a cargo bike. This product is intended exclusively for installation in Butchers & Bicycles cargo bikes.

Max. total load: 44 kg  
Recommended weight, each child\*: 9–22 kg  
Recommended child age: 1–6 years

\* It is permissible to carry a single child weighing more than 22 kg, but less than 44 kg (max. total load)

- Consult a paediatrician before carrying children younger than 1 year. The children must be capable of sitting unaided for at least as long as the intended cycle journey.
- Ensure initially and re-check from time to time that the child's weight and size do not exceed the maximum capacity of the seat.

**⚠ DANGER** Use other than described in this manual can lead to serious injury!

## PARTS OF THE CHILD SEAT

Familiarise yourself with the parts of the child seat. The numbers below are referred to throughout this user manual.

 See illustration A

- 1 Shell
- 2 Back cushion
- 3 Seat cushion
- 4 Shoulder pad
- 5 Adjustment buckle
- 6 Chest clip
- 7 Adjustment strap
- 8 5 point buckle
- 9 Seatbelt
- 10 Mounting bolts
- 11 4 mm hex key
- 12 10 mm wrench

## INSTALLATION

### Installing the seat in the cargo bike

 See illustration B

- Remove the seat cushion (3) from the child seat to expose the mounting holes.
- Place the child seat on top of the raised flat surface inside the Cargo Box and line up the mounting holes in the seat with matching holes in the box.
- Insert a bolt into each of the 6 holes, each with a rubber and a metal washer (the rubber washer should be touching the child seat shell)

- Reach underneath the cargo bike and thread a rubber washer, a metal washer and a locking nut onto each of the 6 mounting bolts (the rubber washer should be touching the bottom of the box)
- Tighten each bolt using a 10 mm wrench (12) and a 4 mm hex key (11). Recommended tightening torque 5–7 Nm.
- Re-install seat cushion.

 The child seat is backwards compatible with all Butchers & Bicycles MK1-E and MK1 cargo bikes. If your bike didn't come with the 6 mounting holes, contact an authorised Butchers & Bicycles dealer for help with installation.

**⚠ DANGER** Only use this child seat with Butchers & Bicycles MK1-E and MK1 models.

**⚠ DANGER** Check whether all parts of the bike function correctly with the seat mounted.

### Removing the seat from the cargo bike

- Remove the seat cushion.
- Using a 4 mm hex key and a 10 mm wrench, undo each of the 6 mounting bolts.
- Reach underneath the cargo bike and remove washers and nuts.
- Remove bolts from the seat.
- Re-install the seat cushion and store all bolts, washers and nuts for future use.

## INSTRUCTIONS FOR USE

### Securing a child in the seat

 See illustrations A, C

- Open the 5 point buckle (8) and the chest clip (6). Seat your child so that the 5 point buckle (8) is in the centre of the body.
- Put the shoulder pads (4) on each side of the child's neck and bring the two male ends of the 5 point buckle around the hips.
- Close the 5 point buckle and the chest clip.

 When riding, close the 5 point buckle on any seatbelt which is not in use to avoid noise.

### Adjusting the seatbelts

 See illustration C

**To loosen the seatbelt** lift and pull up on the adjustment buckles (c)

**To tighten the seatbelt** pull on the adjustment straps (d)

**Slide the chest clip** to the child's armpit level or as close as possible (a)

If necessary, the height of the 5 point buckle can be adjusted up or down (b)

 Make sure the seatbelt is tight around the hips and chest. You must tighten the seatbelt if it is so loose that you can pinch the straps between your fingers.

**⚠ DANGER** Ensure that the seatbelts are not loose or able to become trapped in any moving parts, particularly the wheels. This applies also when the cargo bike is ridden without a child in the seat.

**⚠ DANGER** Always use the seatbelts and ensure that the children are restrained in the seat.

## MAINTENANCE

### Removing a seatbelt from the child seat

- ▶ Remove both cushions from the child seat to expose the seatbelt attachment points.
- ▶ Remove each seatbelt end from the slots at its attachment point (For the strap holding the 5 point buckle, you will also have to remove it from the plastic adjustment buckle).

### Reinstalling seatbelts

#### Option 1—Two seatbelts side by side

 See illustration D

- ▶ Remove the child seat from the cargo bike.
- ▶ Remove the cushions (2),(3) from the seat.
- ▶ Install the ends of each seatbelt in the correct locations according to the illustration i.e. install the seatbelt end marked (a) into the location (a), using the technique shown in detail (a), and so on.
- ▶ Ensure that the seatbelt is securely installed: pull on each of the 5 attachment points and check that the straps do not loosen as you do so.
- ▶ Replace the cushions.

#### Option 2 — One seatbelt in the middle

- ▶ Remove the child seat from the cargo bike.
- ▶ Remove the cushions (2),(3) from the seat.
- ▶ Install the ends of the seatbelt in the correct locations according to the illustration D.
- ▶ Ensure that the seatbelt is securely installed: pull on each of the 5 attachment points and check that the straps do not loosen as you do so.
- ▶ Replace the cushions.
- ▶ Store the unused seatbelt for future use.

### Reinstalling cushions

The cushions are attached with velcro for easy removal and re-installation.

When reinstalling the cushions, ensure that:

- ▶ the seat cushion (3) protrudes 1 cm in front of the seat shell—this ensures best comfort for the underside of the children's knees.
- ▶ the top edge of the back cushion (2) is in the same height as the slot where shoulder straps emerge from the shell.

### Cleaning

Clean the seat shell and cushions with lukewarm soapy water only. The seatbelts can be washed in a washing machine if necessary. Remove the seatbelts from the seat, place them in a washing bag and wash at 40° with little or no detergent. Air dry. Do not tumble dry.

**⚠ CAUTION** Do not use abrasive substances or solvents to clean any part of the child seat. Do not paint or apply decals to the child seat.

## SAFETY WARNINGS

**⚠ DANGER** Ensure that it is not possible for any part of the child's body or clothing to come into contact with any moving part of the cargo bike. Re-check as the child grows.

**⚠ DANGER** Ensure that there are no sharp objects within the children's reach. Do not carry any items in the bicycle's cargo box that could cause injury to the children in the event of a crash.

**⚠ DANGER** Children in the seat must be clothed more warmly than the rider and protected from rain.

**⚠ DANGER** Check the seat temperature before seating your child, especially on hot, sunny days.

**⚠ DANGER** Do not attach additional luggage to the child seat. Place any items in the cargo box, or on a suitable carrier on the rear of the cargo bike.

**⚠ DANGER** Do not modify the seat.

**⚠ DANGER** The cycle may behave differently with children in the seat, particularly with regard to balance, steering and braking. Practice cycling with children in a safe area outside public roads.

**⚠ DANGER** Never leave the cycle parked with a child in the seat unattended.

**⚠ DANGER** Do not use the seat if any part is broken. In case of damage to any part of the seat, contact an authorised Butchers & Bicycles dealer to order a replacement.

## LEGAL REQUIREMENTS

- ▶ Before using this product, check whether there are any laws specific to the carrying of children in seats attached to cargo bikes that apply in your country.
- ▶ Always follow local regulations regarding the use of helmets for children and the rider when cycling.
